Turning on Audio and Video in Opera	7
Turning on the Audio and Video in Firefox	9
Turning on Audio and Video in Edge	11

Turning on audio and video in Chrome

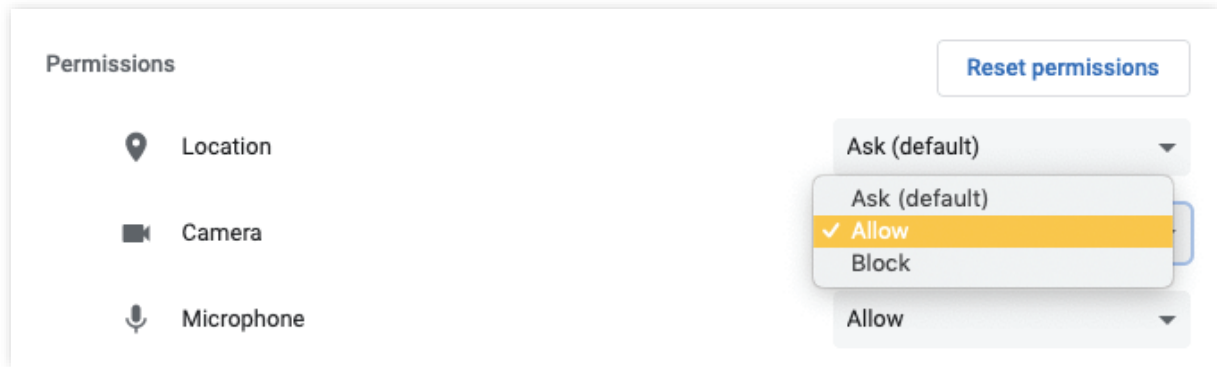

1. Click on the **padlock** icon to the left of the site address. From there, click on “**Site Settings**”.

2. You'll be redirected to your settings page, from there go to your **camera** and **microphone** settings.

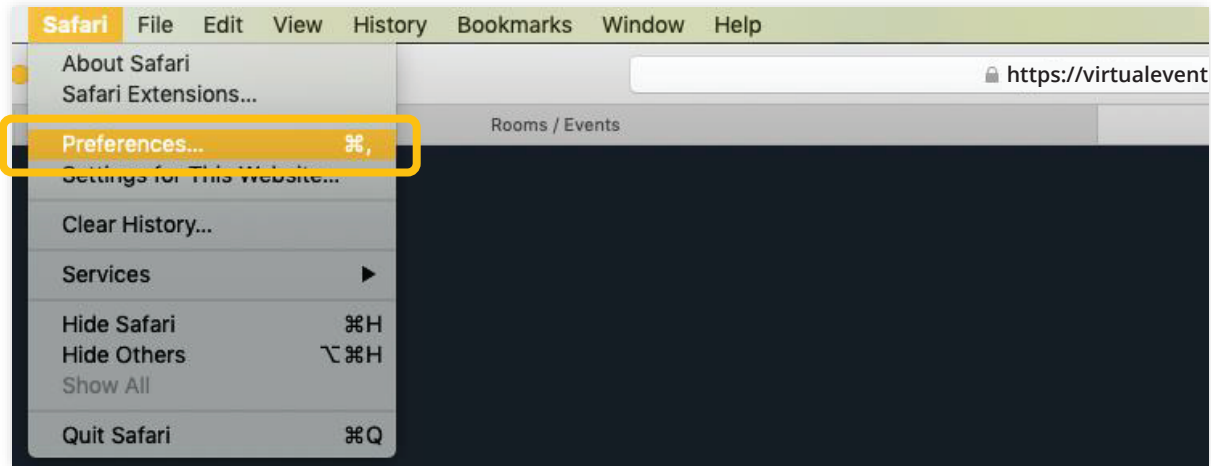

3. Select the option “**Allow**” or “**Ask (default)**” for both your camera and microphone settings.

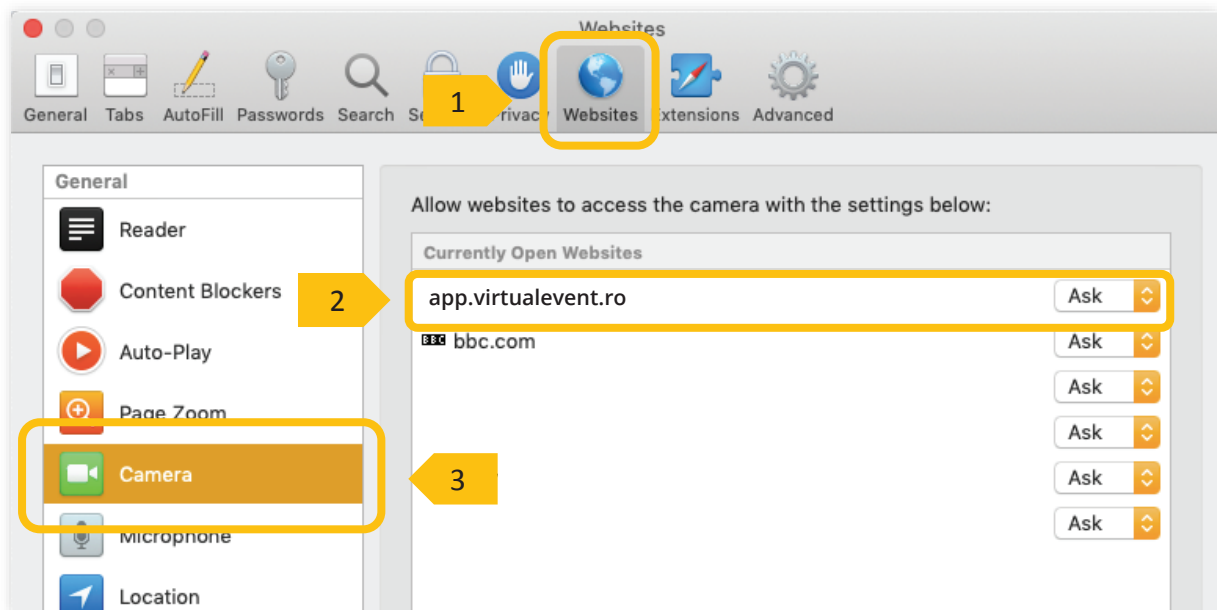

Turning on Audio and Video in Safari

1. Click on **Safari** in the top left of your screen, and then click on **Preferences**.

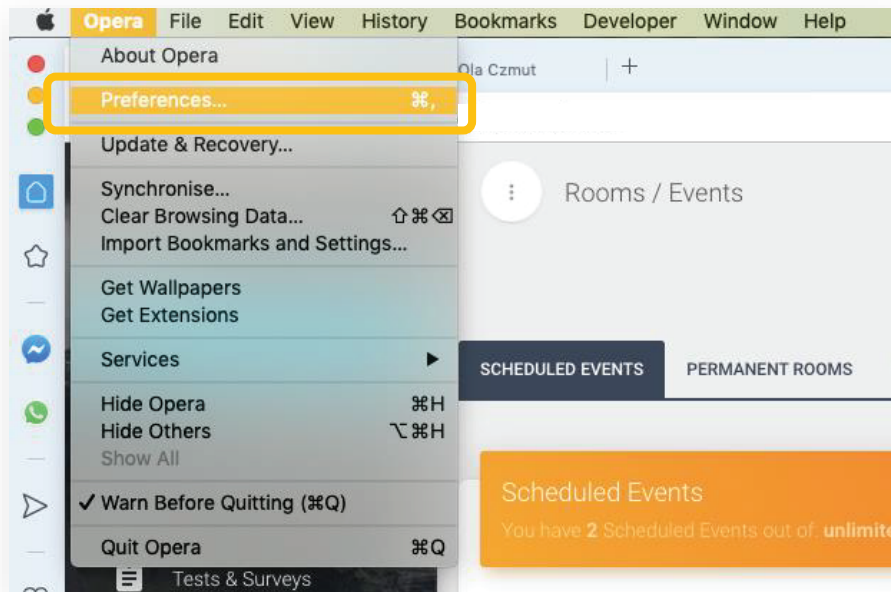

2. You will be redirected to the preferences section. From there, select “**Websites**” (1) at the top of the menu. Next, select “**Camera**” (2) from the left part of the menu and change the settings of “**app.virtualevent.ro**” to **Allow** (3). Follow the same steps with the microphone.

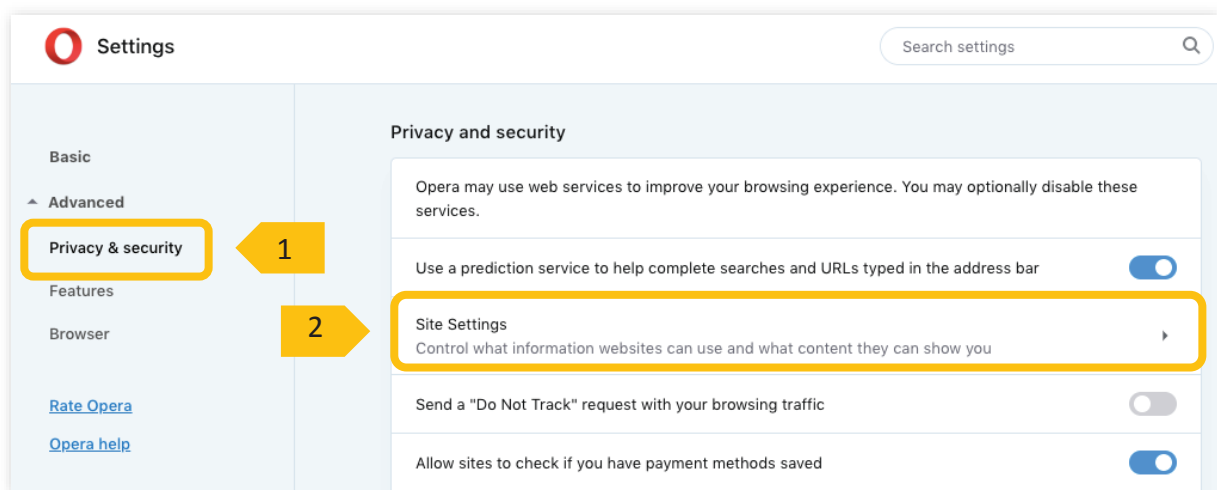

Turning on Audio and Video in Opera

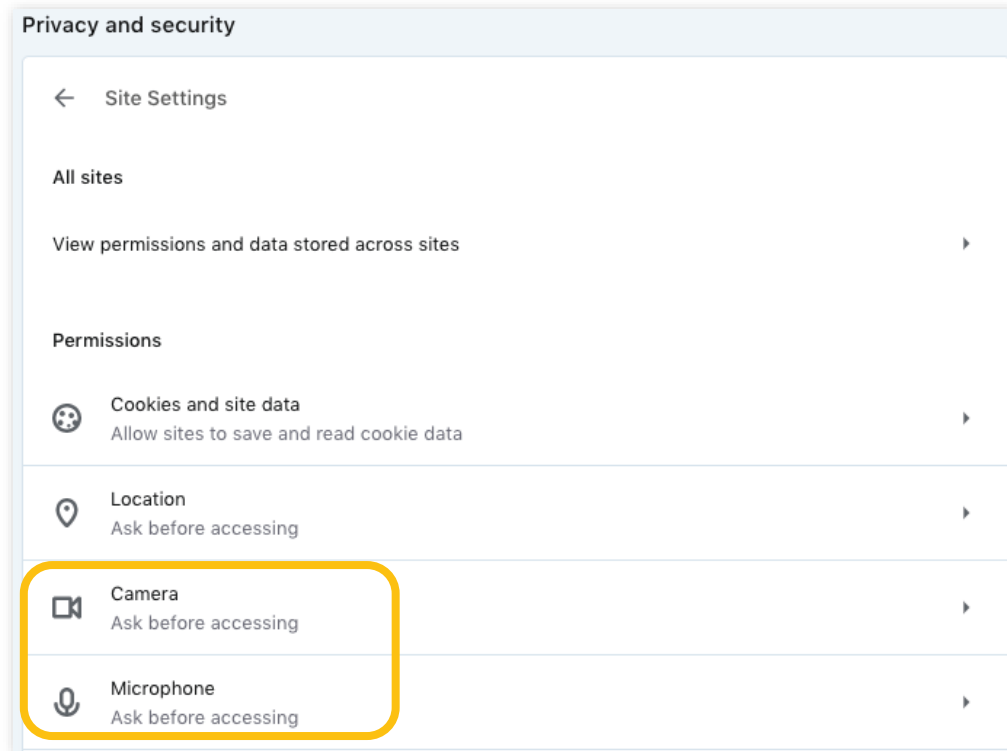

1. Open the main menu of the browser and select **“Preferences”**.

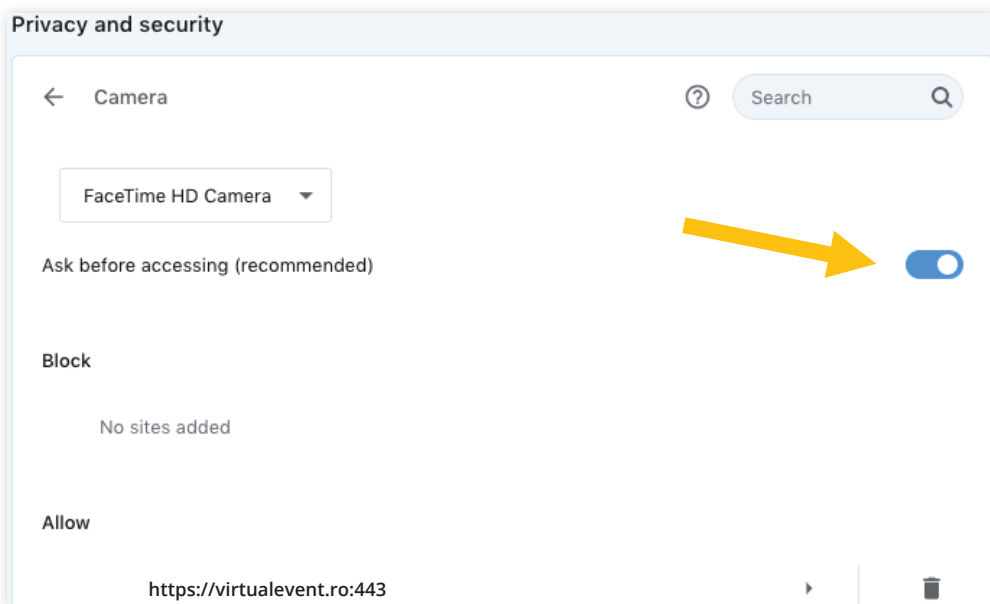

2. You will then be redirected to the browser settings, from there click on **“Privacy & Security”** (1), and then **“Site Settings”** (2).

3. Once in the site settings, select **“Camera”** from the dropdown menu.

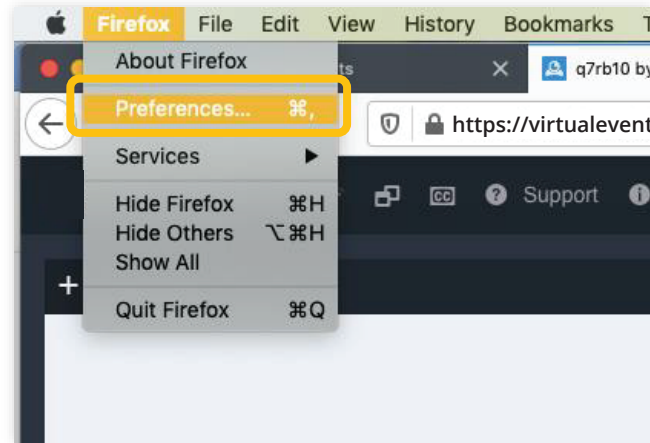

4. Change the settings to **“Ask before accessing”** by moving the **slider**. Repeat the same steps for the microphone.

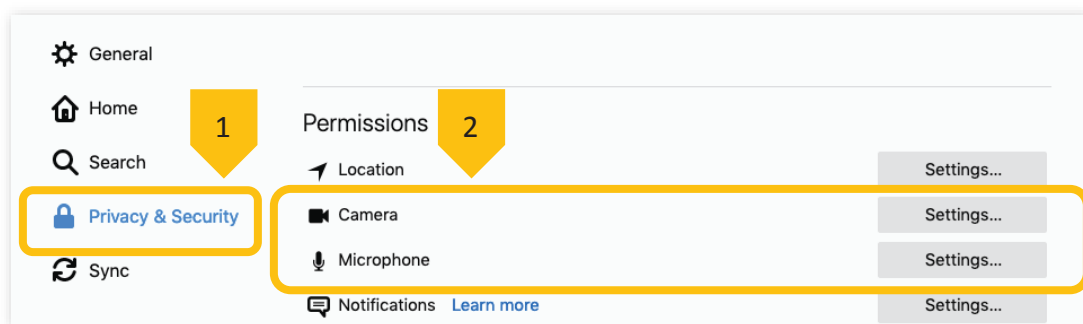

Turning on the Audio and Video in Firefox

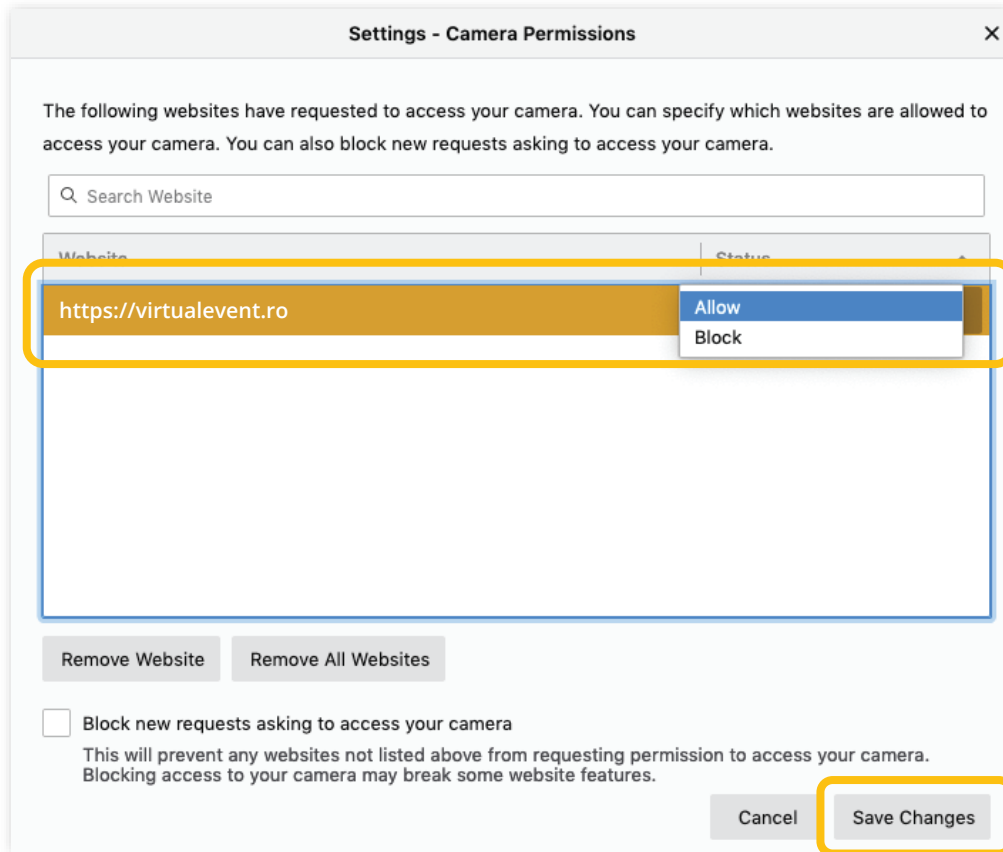

1. In the left upper corner click on the Firefox menu and select “**Preferences**”.

2. Once in the preferences menu, go to “**Privacy & Security**”. From there, go to the camera settings.

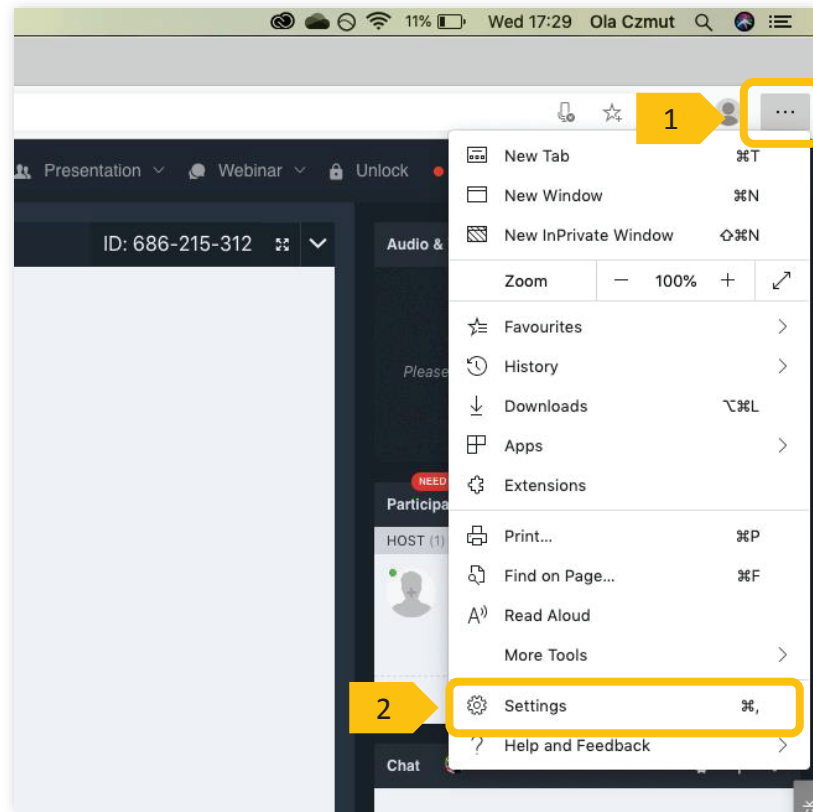

3. Then, select “**Allow**” at the address of Virtual Evant (virtualevent.ro). Remember to click “**Save Changes**” at the bottom of the pop-up window. Follow the same steps for the microphone.

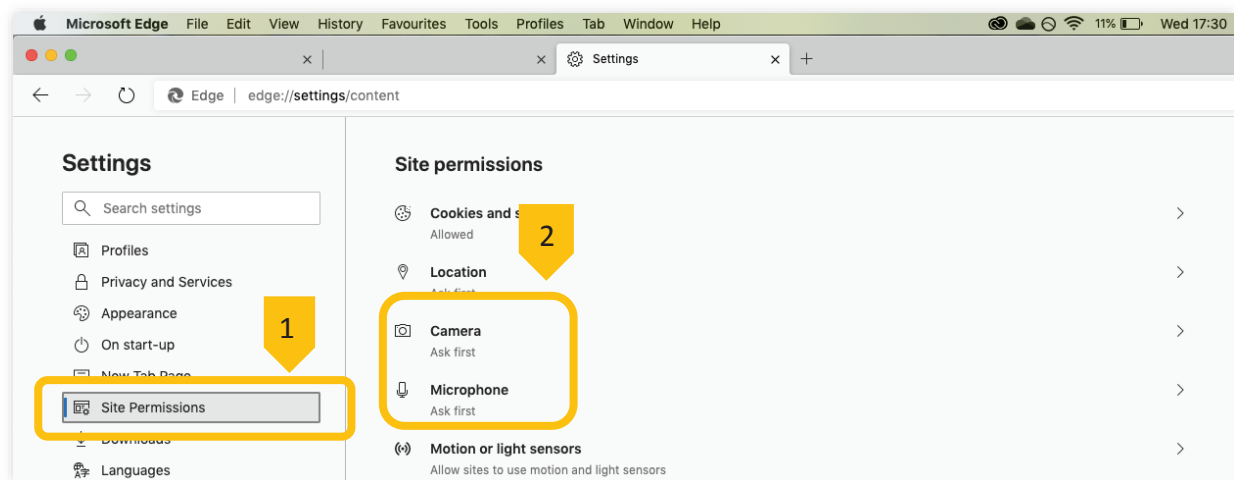

Turning on Audio and Video in Edge

1. In the top right corner of your Edge browser, click on the **menu** (three dots), and go to **“Settings”**.

2. You will be redirected to the settings page. From there go to the **“Site Permissions”** (1) and then click on **“Camera”**.

5. You will be redirected to the camera settings menu. From there, select **“Ask before accessing”** by toggling the switch on. Follow the same steps for the microphone.
